

Aerial Lift Train the Trainer Ottawa

Aerial Lift Train the Trainer Ottawa - The train the trainer program for aerial lifts helps to teach the trainers how to safely train potential operators in an industrial setting. Trainers will be given in-depth instruction about the workings of aerial lift machinery. The program is provided on an open enrollment basis and delivered at select training sites. Prior to certification, trainers are assessed and scored based on their understanding and demonstrated skills.

The Aerial Lifts Train the Trainer Certification Program emphasizes practical learning. As the best training provider in the business, we give the best hands-on training possible through chances to practice techniques and concepts taught within the classroom. Along with hands-on experience, trainers develop general understanding of equipment theory and instructional methods, field and classroom communication skills, and ability to efficiently train and evaluate operators. Trainers will gain knowledge about what traits make a successful trainer.

The Aerial Lift Train the Trainer Certification Program teaches the instructional techniques included in communicating concepts in a classroom and/or field condition. Knowledge requires a training part to be effective in workplace conditions. There are three aspects of machine operation which the trainer must learn how to convey to operators: what to carry out; how to do it; and why it needs to be done.

In the program, trainers would be given the detailed, latest reference material to better help them convey the information to machine operators. The instruction manuals used, contain detailed information about all aspects of industrial mobile equipment operator training. Incorporated in the package are training aids which provide a visual reference in order to enhance the learning experience. The equipment-specific training products include necessary materials meant for both the operator and the trainer: videos/DVD's, overhead transparencies, equipment models, safety message posters; stability pyramids and digital training aids.
