

Clark Forklift

Clark Forklift Forklift Training - Performing globally, there are currently 350,000 Clark forklifts and lift vehicles in operation, with in excess of 250,000 of those in commission in North America. Clark has five main lines of forklifts across the world, making it one of the most expansive organizations in the industry. Heavy duty trucks ranging from 1,500lb to 18,000lb capacities, dual fuel, gasoline, LPG, hand-driven lift trucks, narrow-aisle stackers and electric riders are some of their specialties.

Clark Totalift has 20 distinctive designs of lift trucks, with components covering more than 120,000 specialized items for all of its automated equipment. Your regional Clark Dealer is your total source for availability of all your parts needs offered by Clark Totalift.

Clark features a exceptional Parts Distribution team. The components warehouses are conveniently located in Changwon, South Korea and Louisville, Kentucky to guarantee exceptional service to both their customers and their dealers. For over 90 years, Clark has surpassed industry standards, being one of the most actively advancing producers. Driven to provide the highest level of value and service to our users, Clark remains on the cutting edge when it comes to improving output and benefiting performance.

Clark Totalift has a really amazing international support network. With over 550 locations worldwide, supplier representation in over 80 countries and 230 locations in North America, their high level of dedication to their customers predominates the materials handling market.

By revolutionizing the operator restraint system safety feature, Clark proudly remains a leader of refinement in the industrial equipment and automated forklift industry. This exceptional commitment to safety is now a standard feature on every lift truck.

Clark's recurrent goal to have the No. 1 Quality system in the industry is proudly demonstrated by ISO 9001 — Clark, is the first forklift maker across the world to be certified with the internationally accepted quality standard ISO 9001 for every one of their production facilities. Furthermore, the ISO 14001 Environmental Stewardship System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be prepared for any number of environmental limitations, thus placing them in a dominant industry position.

Resource Efficient Manufacturing

Clark has chosen the structure of "Lean Manufacturing" at all of its assembly plants for the reason that this method is particularly economical and permits minimal use of resources. Established to ensure maximum efficiency, this system is intended to find and acknowledge the most efficient methods for production plant stewardship. Clark has completed this transition of its Korean facility. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and manufacturing efficiencies.

Engine Design

Clark's product engineers and suppliers communicate together to enhance the efficiency and excellence of their merchandise while minimizing expenses. The new value engineering agenda combines modern product development and offers superior client support and service within the industry.
